spermidine **LIFE**®

## Focuses on Holistic Support of the Cell

spermidineLIFE® is the only natural spermidine supplement with Novel Food Authorisation (EU)

### ACTIVATE

Spermidine stimulates natural cellular processes that “wake up” your cells and boost their performance. This helps them produce energy more efficiently and carry out their metabolic tasks effectively. The result is greater vitality at the cellular level.

### Cleanse

By activating autophagy, spermidine breaks down and recycles damaged or aged cellular components. This inner “spring cleaning” frees cells from molecular waste that could otherwise impair their function. At the same time, it makes room for new, fully functional structures.

### Protect

Spermidine helps protect cell membranes and DNA from harmful external influences such as free radicals, toxins, and inflammation. It strengthens the cell’s natural defense mechanisms, acting like an invisible shield. This helps maintain the integrity of the cell structure and supports long-term health.

*No cellular life  
without Spermidine*

What is Spermidine  
Explanation Video

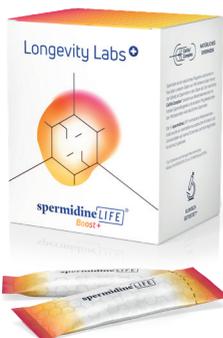

## spermidineLIFE® Pro+

### High dose treatment for intensive cell renewal

Designed for starting your spermidine intake and optimizing a premium supplementation protocol

- ✓ Delivers 6 mg of spermidine, the key dose to boost autophagy
- ✓ Clinically validated dosage used in our ongoing human trials
- ✓ 30 sachets for one month

## spermidineLIFE® Boost+

### Maintenance dose in sachets

Contains 3 mg of natural spermidine for daily cell renewal

- ✓ 30 sachets for one month

## spermidineLIFE® Original 365+

### Maintenance dose in capsules

With 2 mg of natural spermidine per daily dose

- ✓ 60 capsules for one month. Take 2 capsules daily with water

Start your spermidine routine with **spermidineLIFE Pro+** at a high dose to kickstart autophagy. Afterwards, continue with **spermidineLIFE Pro+** as part of your Premium Protocol, or switch to a lower maintenance dose with **spermidineLIFE Boost+** or **spermidineLIFE 365+** for an additional two months. Repeat this regimen as needed.

A minimum cure of three months is recommended, while studies show that the greatest benefits are achieved with long-term use.

More about Spermidine

# What makes spermidineLIFE so unique?

spermidineLIFE® is the only officially approved spermidine supplement worldwide (Novel Food in the EU).

The approval of spermidineLIFE® made human research possible in the first place. As a result, groundbreaking studies were published in collaboration with renowned universities.

spermidineLIFE® is extracted from natural wheat germ sourced from Central Europe \*(non GMO) and produced in Graz using a specially developed extraction process.

Due to its approval, there are safety and tolerability studies, which are essential for therapeutic intervention.

Other spermidine supplements often do not guarantee quality and spermidine concentration. They are mostly derived from soy (methionine in soy can inhibit cell renewal) or enriched with synthetic spermidine.

The natural CelVio® Complex in spermidineLIFE is unique. In addition to spermidine, it contains other polyamines (spermine, putrescine), healthy fats, vitamins, and minerals.

Based on more than 10 years of research in cooperation with internationally renowned cell researchers, spermidineLIFE® was developed and hence, the world's first food supplement with high spermidine content.

It was then tested for safety and tolerability in collaboration with international clinics and universities and received the Novel Food authorisation.

The products in the spermidineLIFE® line are 100 % natural and contain spermidine from wheat germ, as well as zinc, that protects the cells from oxidative stress.

# nadLIFE® Energy+

## More Energy for your cells

NAD+ (Nicotinamide Adenine Dinucleotide) is a coenzyme that exists in all living cells. It acts as an electron carrier in the mitochondria and is crucial for ATP production (Adenosine Triphosphate, ATP).

- ✓ Provides the cells with new energy
- ✓ Suitable as a combination treatment with spermidineLIFE®
- ✓ 30 sachets for one month

## How does nadLIFE® Energy+ work?

Unlike other NAD+ supplements that use NMN as a source of niacin, NAM passes directly through the cell membrane and does not need to be transformed.

It can then be further processed to NAD+ and support the energy balance in our cells.

2

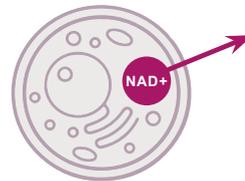

3

4

nadLIFE® Energy+ contains a combination of NAM – a form of niacin – and ribose. Ribose is needed to metabolise the NAM in the organism to NAD+ more efficiently.

In the cell, NAM is enriched with ribose present in the product and phosphorus found in the cell.
